- Active Listener
- Problem Solving

PROJECTS

Food Ordering Responsive Website (Frontend)
- Language used - HTML, CSS, JAVASCRIPT
- Responsive Web Design is a web development approach that creates dynamic changes to the appearance of website. Thus, the Food Responsive Website is based on this methodology, making it responsive according to the screen type used.

Object Detection System Using CNN & Open CV
- Language used - Python, OpenCV, CNN
- Object detection is a computer vision technique that allows us to identify and locate object in an image, video or in real-time. With this kind of identification and localization, object detection can be used to count objects in a scene and determine and track their precise locations, all while accurately labelling them.

Food Ordering Android App
- Language used – Java, Firebase, Room Database
- Food Ordering App is an Android OS based application like Zomato or Swiggy, through which we can order the food or snacks given in the menu of the app. Also, the firebase and room database concept of android studio has been applied to this project for backend.
